Professional Summary

SAP Production Support Consultant with 6 months of hands-on experience supporting stock management in a live SAP production (PRD) system at Tata Electronics System Solutions. Experienced in resolving goods movement errors, investigating stock mismatches, supporting physical inventory, and monitoring jobs and IDocs. Comfortable working within SLAs, testing fixes in the quality system, and coordinating with senior consultants and FI, security and Basis teams to close tickets.

Skills

- **SAP** Area: Stock management support in the SAP production (PRD) system
- **Inventory Transactions:** MIGO, MMBE, MB52, MB51, MB1A / MB1B / MB1C, MMPV, MMRV, MI01, MI04, MI07, MM03
- **Key Areas:** Goods receipt, goods issue, transfer postings, stock types (unrestricted, quality, blocked), movement types, physical inventory, posting periods
- **Monitoring:** Background jobs (SM37), IDoc monitoring and reprocessing (WE02, BD87)
- **Support Activities:** Incident management, root cause analysis, SLA tracking, ticket prioritisation (P1–P4), UAT support
- **Tools:** Ticketing tool [ServiceNow / Jira], MS Excel, MS Word
- **Soft Skills:** Clear user communication, documentation, teamwork, willingness to learn

Work Experience

SAP Production Support Consultant | Tata Electronics System Solutions | Sep 2024 – Mar 2025

Environment: SAP S/4HANA / ECC 6.0 | System: SAP Production (PRD) | Area: Stock Management

- Provided L1 support in the live production (PRD) system for stock management tickets, handling P3/P4 tickets independently and supporting seniors on P1/P2, within agreed SLAs.
- Resolved goods movement errors in MIGO for goods receipts, goods issues and stock transfers (movement types 101, 201, 261, 301, 311), such as deficit of stock and posting period errors (MMPV / MMRV).
- Investigated stock mismatches using MMBE, MB52 and MB51, and handled transfers between unrestricted, quality inspection and blocked stock.
- Supported physical inventory activities, including creating documents, entering counts and posting differences (MI01, MI04, MI07).
- Monitored background jobs (SM37) and reprocessed failed goods movement IDocs (WE02, BD87), escalating recurring failures to the relevant team.
- Reproduced issues in the quality (QAS) system, tested fixes before go-live, and prepared user guides for recurring stock issues to reduce repeat tickets.
