SUMMARY

Azure Data Engineer with 4+ years of experience in designing, developing, and maintaining scalable ETL/ELT data pipelines using Microsoft Azure data services. Strong hands-on experience with Azure Data Factory (ADF), Azure Data Lake Storage Gen2 (ADLS Gen2), Azure Databricks, PySpark, SQL, and Delta Lake.

Experienced in building end-to-end data ingestion and transformation pipelines, implementing incremental data loads, handling large datasets, optimizing Spark jobs, and developing reliable data integration solutions. Good understanding of Medallion Architecture, Delta Lake, SCD Type 1/Type 2, data quality, pipeline parameterization, error handling, monitoring, and performance optimization.

Strong knowledge of SQL including joins, CTEs, subqueries, window functions, aggregations, stored procedures, views, query optimization, and analytical queries. Experienced in working with structured and semi-structured data and developing production-ready ETL/ELT workflows.

EDUCATION

Vikrama Simhapuri University
Bachelor's Degree in B.com *2021*

EXPERIENCE

Azure Data Engineer Present
GLAUBEN INDUSTRIES PVT LTD *HYDERABAD*

Roles and Responsibilities

- Designed and developed scalable ETL/ELT pipelines using Azure Data Factory to ingest data from multiple sources into Azure Data Lake Storage Gen2.
- Developed ADF pipelines using activities such as Copy Activity, Lookup, ForEach, If Condition, Execute Pipeline, Stored Procedure, Web Activity, and Get Metadata.
- Implemented parameterized and metadata-driven pipelines to process multiple files and datasets dynamically.
- Built ingestion pipelines for CSV, JSON, Excel, relational database, and API-based sources.
- Implemented incremental data loading using watermark columns, timestamps, and control tables to avoid unnecessary full loads.
- Developed transformation logic using Azure Databricks and PySpark for cleansing, standardization, enrichment, aggregation, and joining large datasets.
- Implemented Delta Lake tables for reliable storage and processing of transformed data.
- Designed data pipelines following Medallion Architecture, with Bronze, Silver, and Gold layers.
- Developed PySpark jobs to process large datasets and optimize transformations using techniques such as filter pushdown, partitioning, caching, and broadcast joins.
- Implemented SCD Type 1 and Type 2 logic for maintaining historical changes in dimension tables.
- Used Spark SQL and DataFrame APIs for data transformation and analytical processing.
- Created reusable PySpark functions and modular notebooks to improve maintainability and reduce code duplication.
- Implemented data quality checks including null validation, duplicate detection, schema validation, record count validation, and business rule validation.
- Designed error handling and failure notification mechanisms within ADF pipelines.
- Monitored pipeline executions using Azure Data Factory monitoring and investigated failed activities and data processing issues.
- Used Azure Key Vault to securely manage database credentials, secrets, and connection information.

- Worked with Azure SQL Database / SQL Server / Synapse for storing and querying transformed data.
- Developed complex SQL queries involving joins, CTEs, subqueries, window functions, aggregations, and ranking functions.
- Optimized SQL queries and Spark jobs to improve pipeline execution time and resource utilization.
- Implemented partitioning strategies in Data Lake and Delta tables based on business and query requirements.
- Worked with Git-based version control for maintaining ADF pipelines, Databricks notebooks, and code.
- Participated in Agile ceremonies including sprint planning, daily stand-ups, backlog refinement, and retrospectives.

TECHNICAL SKILLS

Cloud: Microsoft Azure

Azure Services: Azure Data Factory, Azure Databricks, Azure Data Lake Storage Gen2, Azure Blob Storage, Azure SQL Database, Azure Logic Apps, Azure DevOps, Azure Monitor, Azure Virtual Machines, Azure Storage Explorer

Programming: SQL, Python, PySpark

Databases: SQL Server, Azure SQL

DevOps & Tools: Git

Reporting: Power BI

CERTIFICATIONS

Microsoft Certified: Azure Databricks Data Engineer Associate

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge.
